In re Patent Application of:
Yusel UKAWA

Application No.: 10/538,280

Confirmation No.: 1869

Filed: June 10, 2005

Art Unit: 2871

For: COLOR FILTER AND LIQUID CRYSTAL
DISPLAY DEVICE USING IT, AND THEIR
MANUFACTURING METHODS

Examiner: Matthew Tynan

RENEWED PETITION UNDER 37 C.F.R. § 1.181

Mail Stop PCT
Commissioner for Patents
Office of PCT Legal Administration
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This is in reply to the Decision on Petition Under 37 C.F.R. § 1.181 dated December 3, 2007. A request for a three (3) month extension of time under 37 C.F.R. § 1.136(a) is also being filed concurrently herewith. Therefore, the due date for filing a Renewed Petition in this matter has been extended to May 5, 2008 (Monday).

In the Decision on Petition, the Attorney Advisor in the PCT Legal Administration Office stated the following:

To correct the above processing errors, applicant should submit a complete copy of the 10 June 2005 submission for PCT/IB2003/05955, a copy of the postcard receipt and a statement that they are a true copy of the earlier submission. The Office can then create an application file for the national phase with only the appropriate papers. (Decision on Petition Under 37 CFR 1.181, page 1).

As the Attorney Advisor will note, attached hereto are the following documents:

1). A complete copy of the June 9, 2005 submission (The papers were mailed by Express Mail on June 9, 2005 and were received by the U.S. Patent Office on June 10, 2005), including a transmittal letter (it is noted that this transmittal letter is incorrect and should have listed International Application No. PCT/IB03/005955 thereon instead of PCT/IB03/05948; however, the rest of the documents identified the correct PCT Application No.); a Preliminary Amendment, a Declaration and Power of Attorney, an Assignment with Recordation Form Cover Sheet; an Information Disclosure Statement with PTO/1449 Form, and a Statement Under 37 CFR § 1.37(b); and

2). A copy of the stamped postcard receipt dated June 10, 2005.

Applicant respectfully submits that the enclosed documents are true copies of the earlier submission. Therefore, it is requested that a serial number be issued in the present application and forwarded to the undersigned as soon as possible.

If necessary, the Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 02-2448 for any additional fees required under 37 C.F.R. §§ 1.16 or 1.17; particularly, extension of time fees.

Dated: May 5, 2008

Respectfully submitted,

By 
Paul C. Lewis
Registration No.: 43,368

Title: LIQUID CRYSTAL DISPLAY DEVICE WITH AN
OPTICALLY DIFFUSIVE REFLECTING LAYER AND
MANUFACTURING METHOD FOR THE SAME

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

PRELIMINARY AMENDMENT

Sir:

Prior to calculation of the filing fee and examination please amend the above-identified application as follows:

Amendments to the Specification there are no amendments in this paper.

Amendments to the Claims begin on page 2 of this paper.

Remarks/Arguments begin on page 5 of this paper.

Appl. No. Unassigned; F. No. JP02 0023 US
And: dated 07-Jun-2005
Preliminary Amendment

Amendments to the Claims

1. (CURRENTLY AMENDED) A liquid crystal display device comprising a liquid crystal layer for performing optical modulation in accordance with an image to be displayed and a diffusive reflecting layer for diffusively reflecting light having passed through the liquid crystal layer to the liquid crystal layer with a diffused reflected light distribution having a predetermined directivity, wherein
- the diffusive reflecting layer has a function of giving the reflected light a diffused reflected light distribution in which: a first range of viewing angles within which reflected light rays of luminous flux of predetermined proportion of the first total luminous flux of reflection are obtained is defined, the first total luminous flux being obtained in a specific plane including an imaginary axis of a specific direction along a principal plane of the diffusive reflecting layer and the normal to the principal plane by incident light in a direction parallel to the normal, the first range of viewing angles having the direction of the incident light as a reference angle; a second range of viewing angles within which reflected light rays of luminous flux of the predetermined proportion of the second total luminous flux of reflection are obtained is defined, the second total luminous flux being obtained by the incident light in the other plane including an imaginary axis of the other direction along the principal plane of the diffusive reflecting layer and the normal to the principal plane, the second range of viewing angles having the direction of the incident light as a reference angle; and the first range is narrower than the second range,
 - as initial average orientation imaginary plane of the liquid crystal layer, including a typical director of liquid crystal molecules in a dark or bright state and the normal to the principal plane of the diffusive reflecting layer, is substantially parallel to the specific plane.
2. (ORIGINAL) A liquid crystal display device as defined in Claim 1, characterized by an orientation film for determining such an initial molecular orientation of the liquid crystal layer that the initial average orientation imaginary plane is set to be substantially parallel to the specific plane.

Appl. No. Unassigned; E No. JP02 0023 US
Appl. dated 07-Jun-2005
Preliminary Amendment

3. (CURRENTLY AMENDED) A liquid crystal display device as defined in ~~Claim 1 or 2~~Claim 1, characterized in that the specific direction and the other direction have substantially a perpendicular relations.
4. (CURRENTLY AMENDED) A liquid crystal display device as defined in ~~Claim 1 or 2~~Claim 1, characterized in that the specific direction is a vertical direction of a display face of the liquid crystal display device, and the other direction is a horizontal direction of the display face.
5. (CURRENTLY AMENDED) A liquid crystal display device as defined in ~~any one of Claims 1-4~~Claim 1, characterized in that the diffusive reflecting layer has a reflecting surface showing roughness of shape based on a plurality of island-shaped outline units of depression or projection portions, and an average diameter of the units of depression or projection portions in the specific direction is greater than an average diameter in a direction substantially perpendicular to the specific direction on the principal plane of the diffusive reflecting layer.
6. (ORIGINAL) A liquid crystal display device as defined in Claim 5, characterized in that an average pitch of the units of depression portions or the units of projection portions in the specific direction is greater than an average pitch of them in a direction substantially perpendicular to the specific direction on the principal plane of the diffusive reflecting layer.
7. (ORIGINAL) A method of manufacturing a liquid crystal display device comprising a liquid crystal layer for performing optical modulation in accordance with an image to be displayed and a diffusive reflecting layer for diffusively reflecting light having passed through the liquid crystal layer to the liquid crystal layer with a diffused reflected light distribution having a predetermined directivity, comprising the steps of:
forming the diffusive reflecting layer in such a form that the diffusive reflecting layer has a function of giving the reflected light a diffused reflected light distribution in which: a first range of viewing angles within which reflected light rays of luminous flux of predetermined proportion of the total luminous flux of reflection

Appl. No. Unassigned; U.S. No. JP02 0923 US
Ampl. dated 07-Jun-2005
Preliminary Amendment

are obtained is defined, the total luminous flux being obtained in a specific plane including an imaginary axis of a specific direction along a principal plane of the diffusive reflecting layer and the normal to the principal plane by incident light in a direction parallel to the normal, the first range of viewing angles having the direction of the incident light as a reference angle; a second range of viewing angles within which reflected light rays of luminous flux of the predetermined proportion of the total luminous flux of reflection are obtained is defined, the total luminous flux being obtained by the incident light in the other plane including an imaginary axis of the other direction along the principal plane of the diffusive reflecting layer and the normal to the principal plane, the second range of viewing angles having the direction of the incident light as a reference angle; and the first range is narrower than the second range,

forming an orientation film for determining an initial molecular orientation of the liquid crystal layer, in such a manner that an initial average orientation imaginary plane of the liquid crystal layer, including a typical director of liquid crystal molecules in a dark or bright state and the normal to the principal plane of the diffusive reflecting layer, is substantially parallel to the specific plane.

Appl. No. Unassigned; F . No. JP02 0023 US
Amtd. dated 07-Jun-2005
Preliminary Amendment

REMARKS/ARGUMENTS

The foregoing amendment(s) to claim(s) was/were made solely to avoid filing the claim in the multiple dependent form so as to avoid the additional filing fee.

The claim(s) was/were not amended in order to address issues of patentability and Applicant respectfully reserves all rights she may have under the Doctrine of Equivalents. Applicant furthermore reserves her right to reintroduce subject matter deleted herein at a later time during the prosecution of this application or continuing applications.

Please charge any fees other than the issue fee and credit any overpayments to Deposit Account 14-1270.

Respectfully submitted,

Date: 6/9/05

ASSIGNMENT

Docket No. PHJP020023 US

For good and valuable consideration, of which I acknowledge receipt, I, as a below-named assignor, sell and assign to Koninklijke Philips Electronics N.V. (hereinafter "Assignee") a corporation existing under the laws of Kingdom of the Netherlands, whose business address Groenewoudseweg 1, 5621 BA Eindhoven, the Netherlands, its successors and assigns, the application for a United States Patent for the improvements in a "LIQUID CRYSTAL DISPLAY DEVICE WITH AN OPTICALLY DIFFUSIVE REFLECTING LAYER AND MANUFACTURING METHOD FOR THE SAME" invented by us, which application:

- ☐ is executed concurrently herewith
☐ was executed by me/us on
☐ is Serial No. filed
☐ is International Application No. filed

and all rights in and to said application, and all Patents which may be granted therefore, and all divisions, reissues, continuations and extensions thereof, and authorize and request the Commissioner of Patents and Trademarks to issue all Patents on said improvements or resulting therefrom to said Assignee as assignee of the entire interest and covenant that I have full right so to do, and agree that I will communicate to said Assignee or its representatives any facts known to me respecting said improvements and testify in any legal proceeding, sign all lawful papers, execute all divisional, continuing and reissue applications, make all rightful oaths and generally do everything possible to aid said Assignee, its successors, assigns and nominees, to obtain and enforce proper protection for said invention.

☒ Please charge any required fee under §1.17(i) or §1.17(p) or any other required fee (except the issue fee) to Account No. 14-1270.

1. ☐ I certify that these documents were first cited in any communication from a foreign Patent Office in a counterpart foreign application not more than three (3) months ago.

2. ☐ I certify that none of these documents were cited in any communication from a foreign Patent Office in a counterpart foreign application, and, to the knowledge of the undersigned after making reasonable inquiry, none of these documents was known to any individual designated in §1.56(c) more than three (3) months ago.

☐ A fee under §1.17(p) is not required under §1.97(c), after the first Action on the merits and more than (3) months after the date of application or RCE, because I certify 1. or 2. as indicated above.

☐ A copy of the citations is not required because they were previously submitted or cited in the parent application (or in U.S. patent application Ser. No. _____ Filing Date: _____) relied on for an earlier effective filing date under 35 U.S.C. 120).

☐ A copy of the U.S. patent(s) and patent application publication(s) in all U.S. national patent applications filed after June 30, 2003, and in all international applications that have entered the national stage under 35 USC § 371 after June 30, 2003 under 37 CFR 1.491(b), are not required.

☐ A concise explanation of the relevance of each non-English document, as understood by the individual designated in §1.56(c) most knowledgeable about the contents, is enclosed per §1.98(a)(3).

The concise explanation of the relevance of any non-English document, as understood by the individual designated in §1.56(c) most knowledgeable about the contents, is that the document is/was:

☐ cited in the specification or considered in drafting the specification of this application;

☐ previously submitted or cited in the parent application (or in a related patent application Serial No. _____ Filing Date: _____);

☐ cited as an "X" or "Y" document in a foreign Patent Office search report in a foreign counterpart application, a copy of which report is also enclosed.

ATTORNEY Docket NUMBER: JPL 3 US

STATEMENT UNDER 37 CFR 3.73(b)

Applicant/Patent Owner: Koninklijke Philips Electronics N.C.	
Application No./Patent No.: Concurrently	Filed/Issue Date: Concurrently
Invented: Liquid crystal display device with an optically diffusive reflecting layer and manufacturing method for the same	

Koninklijke Philips Electronics N.V., a corporation
states that it is:

- ☒ the assignee of the entire right, title and interest,
- ☐ an assignee of less than the entire right, title and interest.
The extent (by percentage) of its ownership interest is _____ % in the patent application/patent identified above,

by virtue of:

- ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____ or for which a copy thereof is attached.
- ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as shown below:
- From _____ To: _____
The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____ or for which a copy thereof is attached.
 - From _____ To: _____
The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____ or for which a copy thereof is attached.
 - From _____ To: _____
The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____ or for which a copy thereof is attached.
- ☐ Additional documents in the chain of title are listed on a supplemental sheet.
- ☒ Copies of assignments or other documents in the chain of title are attached.
(Note: A separate copy (i.e., the original assignment document or a true copy of the original document) must be submitted to Assignment Division in accordance with 37 CFR Part 3, if the assignment is to be recorded in the records of the USPTO. See MPEP 302.08)

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

Date: 6/7/05

Respectfully submitted,
